

Anshul Sehgal

Ambala, Haryana, India | anshulsehgal40601@gmail.com | anshulsehgal.tech | 072060 43563

Summary

Software Engineer aspirant with strong problem-solving skills and a solid foundation in Data Structures & Algorithms. Experienced in designing and shipping end-to-end software features using Python, Java and JavaScript. Hands-on experience with scalable backend systems, AI-powered applications, APIs, databases, and collaborative Agile development. Comfortable owning features from design to deployment and continuously improving code quality and performance.

Skills

Programming Languages: Python, Java, JavaScript (ES6+), TypeScript, C/C++

Data Structures & Algorithms: Arrays, Strings, Hashing, Recursion, Trees, Graphs, Dynamic Programming, Sorting, Searching, Time & Space Complexity

AI & LLM Engineering: RAG, LangChain, LangGraph, Prompt Engineering, Vector Embeddings, Semantic Search

Backend & APIs: FastAPI, Node.js, Express.js, RESTful API Design, Authentication, Middleware, Error Handling, Docker

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Databases: PostgreSQL, pgvector, MongoDB, MySQL, Schema Design, Indexing, Query Optimization

Cloud & DevOps: AWS, Docker, Git, GitHub

Software Engineering Practices: Object-Oriented Programming, Debugging, Agile/Scrum, Code Reviews, Feature Ownership

Core Strengths: Problem Solving, Clean Code, Collaboration, Fast Learning

Projects

HireIQ – AI-Native Hiring Platform – Remote

Apr 2026 – July 2026

AI-native recruitment platform that improves hiring quality through semantic candidate-job matching, AI-generated behavioral assessments, and scalable recruiter workflows.

- Built an AI-powered hiring platform using Next.js, FastAPI, PostgreSQL, pgvector, and LangGraph to replace traditional keyword-based resume screening with semantic matching and Retrieval-Augmented Generation (RAG).
- Engineered a scalable multi-tenant backend with asynchronous AI workflows and real-time recruiter communication, designed to support 10,000+ concurrent candidates and 100+ active hiring pipelines.
- Developed an intelligent pre-application filtering system featuring employer analytics, job description quality scoring, and live LLM usage tracking, reducing low-quality applications by up to 90%.
- Collaborated in an Agile development environment, contributing end-to-end features from architecture and implementation to testing and deployment.

LocalAI – Offline AI Knowledge Assistant – Remote

Sept 2025 – Nov 2025

Built an AI-powered platform capable of answering questions from local documents without external dependency.

- Implemented Retrieval-Augmented Generation (RAG) using vector embeddings and semantic search.
- Designed efficient document chunking and retrieval pipelines using ChromaDB.
- Improved answer relevance and factual accuracy by ~70% through optimized retrieval strategies.
- Ensured complete data privacy by processing all inputs locally with no external API calls.

Education

Chitkara University, B.E. in Computer Science Engineering – Rajpura, Punjab, India

July 2023 – July 2027

- CGPA: 9.02 (till date)

Certifications

Full Stack Web Development - Sigma 4.0

Jun 2025

- Frontend: HTML, CSS, JavaScript, React, Next.js, Tailwind CSS, TypeScript
- Backend: Node.js, Express.js, MongoDB, MySQL

Data Structures and Algorithms in Java - Sigma 4.0

Aug 2025

- Strong focus on problem-solving, OOP principles, collections, and algorithmic thinking
